

As a dedicated front-end developer, I bring a passion for crafting intuitive and dynamic user interfaces. My expertise in HTML, CSS, and JavaScript, along with proficiency in frameworks like React, enables me to build responsive and performant web applications. I have a keen eye for design which allowing me to create engaging and accessible user experiences. I enjoy working in collaborative settings where I can leverage my problem-solving skills and continuously learn from my peers.

## PERSONAL PROJECTS

### SwipTory (04/2024 - 05/2024)

- The primary purpose of this project is to allow users to construct stories of at least three slides by submitting photographs and descriptions
- After signing into the service, users can start writing their own stories. User does not need to be logged in to access the story
- There are features like viewing,sharing and bookmarking of the stories available on the web page

### Project Task Manager (02/2024 - 03/2024)

- The major objective of Project Task Manager is to streamline task management operations
- The program seeks to improve cooperation, promote effective workflow management, and support timely task completion by offering a single platform for task organization, prioritization, and tracking
- The tool provides a clear structure for grouping jobs into stages, allowing users to prioritize and manage their workflow effectively

### Musicart (03/2024 - 04/2024)

- Its principal goal is to bring together all of its customers so they can purchase only music-related items without having to shop around for the best value
- Create a straightforward and visually appealing interface that focuses on ease of navigation, product visibility, and seamless user engagement
- Individual product pages should contain thorough product descriptions, specifications, high-resolution photos, and customer reviews
